

## RNG Wellfield Manage

**Location:** Canonsburg, PA, travel to the Southeast and Midwestern United States.

**Job Type:** Full Time / Salary

**Reports To:** VP of Operations

### Position:

This position's primary focus will be to manage the construction and operations of Landfill Gas wellfields across a portfolio of projects. The Manager will provide supervision to local and third part staff providing guidance, oversight and troubleshooting of the system, while ensuring compliance is maintained with the local/state permits. The Wellfield Manager will ensure communications are maintained with the plant, and local landfill staff.

### Description:

- Ensure all staff are working safely and are properly trained.
- Provide training and supervision to local wellfield technicians on GCCS O&M.
- Routinely evaluate site dynamics to develop win/win scenarios for site improvements.
- Work independently without direct supervision to ensure wellfield are optimized while maintain compliance.
- Develop SOP's and reporting to ensure consistency across the portfolio.
- Observe and enforce all safety and environmental regulations, inclusive of any applicable landfill safety protocols.
- Ensure project compliance with local and state rules and regulations.
- Maintain well field data base and associated logs. Ensure communications are correct and timely to the host sites.
- Support Engineering staff with planning of construction projects and gas collection field expansions.
- Support plant operational support requests.
- Ensure all sites instruments are calibrated as per requirements.
- Ensure timely and professional communications to all stakeholders regarding outages or system impacts.
- Maintain a positive and professional working relationship with the landfill staff.

### Requirements:

- 3-5 years of experience with Landfill gas wellfield monitoring or construction.
- 3-5 years of experience working at a Landfill
- Proficiency in Microsoft Office Suite
- A self-starter possessing strong communication, planning and organizational skills.
- Desire to work on multiple projects in parallel.
- Requires travel to job sites and occasional out of the local area overnight stays. (10% -50% travel)
- Demonstrated ability to effectively manage multiple priorities and business relationships.
- Strong team player that thrives in a fast-paced environment. Must be a self-starter that can operate independently.

### Compensation:

Competitive and commensurate with qualifications and experience to include Incentive Equity + benefit program.
